

PhytoActive Nutraceuticals

*SMOKERS' SUB®

***Smokers' Sub contains Neuravena®** a standardized extract from natural green oats that support reduced cravings for smoking and offer would-be quitters an alternative to patches and gums. One study was conducted with a group of male Japanese volunteers who smoked an average of nearly one pack (20 cigarettes) per day. These clinical volunteers received 3 capsules daily for 28 consecutive days. The 3 capsules a day were found to significantly reduce the average number of cigarettes smoked per day by 55.4%. At the end of the study, the average cigarette smoking decreased by approximately 11 cigarettes per day—from 20 down to only 9 cigarettes daily.

***To successfully quit smoking**, the first few weeks after quitting are thought to be the most significant and the use of Smokers' Sub can be a useful means of successfully stopping smoking if taken while reducing consumption or in the early stages after quitting. The active ingredient in Smokers' Sub works on enzymes in your brain and also affects brain waves in a way that helps stabilize stress levels in the pressured situation of reduced tobacco consumption while it also improves your mood, cognitive performance and intellectual precision.

***Smokers' Sub** is a definite must-have for those wanting to kick the habit. Just 3 capsules a day for 28 days to see dramatic results in reducing the number of cigarettes you smoke per day and positively influencing stress levels that drive you to smoke.
